Fees and Expenses as of 03-31-2024

Total Annual Operating Expense **0.01%** Gross

Gross expense ratio is a measure of what it costs to invest in the fund, expressed as a percentage of its assets, as a dollar amount, or in basis points.

These are costs the investor pays through a reduction in the investment's rate of return. This ratio also includes Acquired Fund Fees and Expenses, which are expenses indirectly incurred by a fund through its ownership of shares in underlying funds.

Risk

Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. "Risk" refers to the possibility of loss of principal, or alternatively to a rate of investment return below expectations or requirements. While volatility (price fluctuation) is not synonymous with risk, it is true that high volatility on the downside results in loss, and therefore higher volatility is associated with higher risk. Volatility, however results in realized losses only if securities are sold after a fall in price.

For more information on risk, see the "Investment Risk Factor Guide" available online in the "UCRSP Fund Menu" section at www.myucretirement.com.

None

Definition of "Fossil Fuel Free"

UC Investments defines "fossil fuel free" as excluding publicly traded companies that own any amount of reserves in thermal coal (not metallurgical coal), oil or gas.

Statement on sustainability

As reflected in the UCRSP Investment Policy Statement (IPS) of the UC Board of Regents, UC Investments incorporates "environmental sustainability, social responsibility, and governance (ESG) into the investment evaluation process as part of its overall risk assessment in its investments decision making. ESG factors are considered with the same weight as other material risk factors influencing investment decision making." In cases in which the Chief Investment Officer finds that investment risks negatively impact investment returns, he may screen out certain companies or sectors. Such companies and sectors, include, for example, companies that manufacture civil firearms; operate private prisons; or own fossil fuel reserves. The UC Chief Investment Officer, in his fiduciary duty, has determined that companies that own fossil fuel reserves face, in the long run, strong secular headwinds for demand, continued price volatility and declining profitability. Removing fossil fuel reserve owning companies from the fund will reduce material risks and therefore have a positive long-term effect. This decision for the fund is consistent with the "de-risking" strategy already undertaken in the UC Pension and Endowment. In selecting and monitoring the type of companies included in the funds, the fund managers are responsible for complying with UC Investments' screens. Mutual funds and collective investment trusts that include assets from other organizations are not subject to UC Investments' screens.

Please access myUCretirement.com website for more information about the University's commitment to sustainability.

This fund is screened.

Fees and Expenses

Gross expense ratio is a measure of what it costs to invest in the fund, expressed as a percentage of its assets, as a dollar amount, or in basis points. These are costs the investor pays through a reduction in the investment's rate of return. This ratio also includes Acquired Fund Fees and Expenses, which are expenses indirectly incurred by a fund through its ownership of shares in underlying funds.
